## 3 Innovative Models for MAJOR-LEAGUE RESULTS On Every Infield!

DESIGNED AND MANUFACTURED BY ABI SPORTS TURF | WWW.INFIELDRASCAL.COM | (877) 788-7253

The INFIELD RASCALS® from ABI marry rugged construction with innovative, finely-tuned craftsmanship that provide both the force for years of tough work *AND* the finesse for professional-level infield finishing. It comes with the faith and endorsement of DuraEdge™ Products, the premiere installer of professional, collegiate, and semi-pro engineered infield surfaces in the US.

**Using the ABI Infield Rascal® will dramatically cut your infield maintenance time while improving the quality, longevity, and playability of your infield surface!**

ABI's patent-pending Vibraflex Drag is a complete re-imagining of the traditional nail board. Evenly staggered U-pins transfer vibration & flex from front to back, shattering the surface tension and allowing deeper moisture penetration.

(SIDE VIEW)

ABI's patent-pending Profile Blade is an innovative component that lifts and decompacts from underneath the infield surface without having to re-grade. The profile blade can also remove lip and warning track vegetation without completely upending your surface profile, allowing for quick renovations!

(SIDE VIEW)

### TWO MODELS OF THE VIBRAFLEX DRAG:

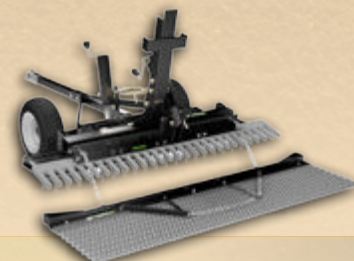

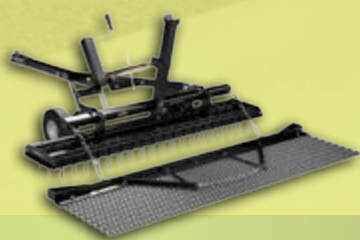

- ▶ **MODEL 3800:** Four staggered rows create **3/4"** spacing with **1/4"** or **3/8"** U-shaped Vibraflex pins
- ▶ **MODEL 5800:** Four staggered rows create **1/2"** spacing with **1/8"** or **1/4"** U-shaped Vibraflex pins
